Benefits

Small low powered (10mW) POCSAG transmitter sends the programmed message directly to the Alphanumeric Pager without the need for a central control box

An alphanumeric message can be programmed into the unit - 'Bedroom', 'Front Door', 'Back Door', 'Fire Exit' etc.

The message can be displayed in large easy to read text.

One pager can be programmed to receive messages from many bed monitors, door monitors, epilepsy alarms etc.

The unit is supplied with a surface back box

c/w surface door contacts (NO), flush contacts M1F are available

PP3 9v Battery

83mm X 83mm X 42mm D

Cream

Compatible with GEO87ZM & GEO28V3MC pagers
